Telemedicine - A Data-Driven Approach

When: Friday, October 12, 2018, 9 am to 4 pm

Where: Charles B. Wang Center (room TBA)

Who: Healthcare professionals interested in learning about telemedicine today and how it will impact the practice of medicine at Stony Brook and how it can benefit early adopters.

Cost: Free

Learning Objectives

1. Understanding how telehealth and mobile platforms drive healthcare delivery at Stony Brook now and tomorrow.

2. Exploring how the intersection of data and telemedicine drives personal wellness, improves patient care, and enhances population health.

3. Understanding legal telehealth issues.

4. Expert clinical mentors will demo various approaches to telehealth.
